

Round Bar Douche TMV Kit

Kit Includes:

Vertical Thermostatic Bar Valve, Wall Bracket, 1.25m Double Interlock Hose, Spray head

Installation Instructions:

All pipes must be flushed carefully before installation the Vertical Thermostatic Bar Valve. Failure to do so will impair the function of the valve and no water will come out. When connecting the water supply, make sure that the pipes are fitted in accordance with the color coding: Hot & Cold water must be fitted in line with the red

dot & the blue dot. The factory set temperature is 38°C.

Wall bracket to be mounted to panel using fixing kit provided. It is recommended that the panel is not relied upon for rigidity.

Guarantee & Aftercare:

During installation extra care must be taken to avoid damaging the fittings. We provide a 3 year guarantee against faulty materials (excluding serviceable parts), providing they have been installed, cared for and used in accordance with our instructions. Clean with soft damp cloth and non corrosive detergent only.

Note: Ensure Angle valve is turned to off position after use.
